SUMMARY

Important developments in connection with the operation of the Massachusetts Division of Employment Security may be summarized briefly as follows:

1. The employment service, which had been transferred temporarily to federal jurisdiction at the outbreak of the war, was returned to state control as of November 16, 1946.
2. The balance in the Unemployment Compensation Fund at June 30, 1947, was \$185,209,447.82--a drop of over \$17,000,000 (8.4%) from the balance at the beginning of the fiscal year.
3. In the current fiscal year, a total of \$48,997,580 was distributed as unemployment compensation benefits to workers in Massachusetts--an amount equal to 1.7 times the amount collected from employers as contributions to the fund in the same period.
4. Under experience-rating provisions of the Massachusetts Employment Security Law, the average contribution rate for all employers was reduced from the regular rate of 2.7% to 1.1% with an estimated saving to employers of more than \$43,700,000.
5. Although post-war readjustments were still in process in many Massachusetts establishments, the Division's employment offices completed 101,450 placements during the year.
6. Some 7,495,457 visits were recorded at local employment offices in the current fiscal year.
7. In all, over 2,000,000 different individuals earned wage credits in covered employment in Massachusetts in 1946. Of these, the greatest number working at any one time during the year was in December, when employers reported a total of 1,471,253--the all-time high since unemployment compensation coverage was established.
8. Dependents' allowances were first paid on April 14, 1947. Since that date they have represented approximately 2.8% of the total amount of benefit payments.
9. While the servicemen's readjustment allowance claim load is diminishing rapidly, it totaled 2,946,743 (both initial and continued claims) and represented 47% of the total claim load in the current fiscal year.
10. Since the initiation of readjustment allowance payments in September, 1944, some 4,730,400 checks, amounting to \$95,057,422, have been issued by the Division acting as agent for the Veterans' Administration. Approximately 57% of this amount was paid in the current fiscal year.

CHART I - ORGANIZATION OF THE DIVISION

CHANGES IN THE MASSACHUSETTS EMPLOYMENT SECURITY LAW
DURING THE FISCAL YEAR ENDED JUNE 30, 1947

The following major changes in provisions of the Massachusetts Employment Security Law became effective in the fiscal year ended June 30, 1947:

1. Totally unemployed workers who are eligible for unemployment compensation benefits are entitled to an additional amount of \$2.00 for each dependent child under age eighteen (except that in no instance shall the total weekly benefits exceed the "weekly wage").
2. The provision of the Law permitting the contribution rate of successor employing units to be based upon the records of the predecessor employing units was extended to some types of reorganization not previously included.

Effective August 20, 1947 unemployment compensation coverage was extended to include service performed by an agent selling or servicing policies of industrial life insurance.

Chapter 151A of the General Laws contained the provision that "the term 'employment' shall include the services performed by an individual as an officer or member of the crew of a vessel of more than ten net tons--engaged in the catching of fish, if and when by any act of congress such services are included within the term 'employment' as defined in the Internal Revenue Code." Since the Social Security Act Amendments of 1946 included such services within the term "employment" effective July 1, 1946, such services automatically became "covered employment" under the Massachusetts Law on that date.

CHANGES IN EXECUTIVE PERSONNEL

Assistant Director William F. Howe returned to duty from the armed services April 10, 1947.

As of November 15, 1946, Mr. Kenneth V. Minihan and Mr. Arthur S. Pegnam were made assistant directors, Mr. Minihan to take over the supervision of the employment service and Mr. Pegnam to be responsible for fiscal management and personnel.

Mr. Joseph A. Dunn was appointed to the Advisory Council January 2, 1947, to serve as an employment representative succeeding Mr. Irving E. Rogers who had resigned.

UNEMPLOYMENT COMPENSATION FUND
SUMMARY OF TRANSACTIONS FOR THE FISCAL YEAR ENDED JUNE 30, 1947

At the end of June 1947, the balance in the Unemployment Compensation Fund totaled \$185,209,447.82--down by nearly \$32,000,000 from the all-time high of August 1945. In the past twelve months benefit payments have exceeded collections from employers plus interest credited to the Unemployment Trust Fund in Washington by \$17,011,420.51.

Since contributions were first receivable in 1936, net receipts from contributions and interest penalties collected have amounted to \$359,704,739.67, while interest earned on investments and credited to the Massachusetts account in the United States Treasury amounted to \$25,741,624.32, bringing total net receipts to \$385,446,363.99. The payment of \$197,924,190.60 in unemployment compensation benefits and the transfer of \$2,312,725.57 to the Railroad Unemployment Insurance Fund in October 1940 resulted in a balance in the Fund on June 30, 1947, of \$185,209,447.82.

Table I summarizes total collections, income, and benefit payments for the years 1936-1939, and for quarterly periods from January 1, 1940, to June 30, 1947. The balance in the Fund at the end of each period is also shown.

The growth of the Fund by quarters over the period from January 1, 1940, to June 30, 1947, together with a comparison of collections and payments in each quarter, is shown in Chart II.

EMPLOYMENT SERVICE FUNCTION

The employment service, which had been transferred temporarily to federal jurisdiction at the outbreak of the war, was returned to state control as of November 16, 1946. Responsibilities of the employment service are as follows:

1. It contacts employers throughout the state to solicit job orders.
2. It registers applicants for employment, and classifies them according to the types of occupations which they are capable of performing.
3. It selects and refers applicants to job openings, matching employers' requirements with applicants' qualifications.
4. It checks with employers to whom applicants have been referred to secure verification of placements.
5. It handles clearance of job openings and applicants between employment offices, and between Massachusetts and other states.
6. It takes and processes claims for unemployment compensation under the Massachusetts Employment Security Law.
7. It takes and processes claims for readjustment allowances under Title V of the Servicemen's Readjustment Act of 1944.
8. It secures information necessary so that the Administrative Office may make proper determinations with respect to the validity of claims filed.
9. It handles special services such as job analysis, applicant testing, job counseling, selective placement of handicapped workers, inter-office recruitment, farm placement activities, and job-order development, when such special services are deemed to be necessary.
10. It collects basic data on labor market conditions and employment trends.
11. It maintains such employment and claim records as are necessary for proper administration.

The employment service includes the operation of a system of free public employment offices, which are distributed in five districts throughout the state. Itinerant points, where employment office personnel give service at specified times, are also maintained. One of the primary

functions of employment offices is to place applicants in jobs. In the current fiscal year, although it was a period when employment expansion was limited by material shortages and problems connected with cost and price relationships, over 100,000 placements were made.

Total Placements Completed by Employment Offices

Fiscal Year	Total	July - December	January - June
1941 - 1942	117,911	55,523	62,388
1942 - 1943	227,800	104,647	123,153
1943 - 1944	284,049	148,105	135,944
1944 - 1945	312,465	158,279	154,186
1945 - 1946	143,295	89,993	53,302
1946 - 1947	101,450	53,492	47,958

Tables III, IV, VI, and VII show the distribution of placements completed in the current fiscal year in each employment office, by sex, and by industry divisions and occupational groups. Data on placements of veterans are shown separately. Examination of these tables indicates the following:

1. For the state as a whole, manufacturing, trade and service accounted for 55%, 19% and 12%, respectively, of total placements made.
2. Men received the majority of placements--in the ratio of nearly two to one.
3. Male placements were most numerous in the unskilled (44%) and semiskilled (19%) groups, while female placements were most numerous in the unskilled (29%) and clerical and sales (26%) groups.
4. Nearly two-thirds of the male placements represented veterans. Comparison of veteran placements with total male placements showed that veterans represented 85% of professional and managerial, and 86% of clerical and sales placements, while in the case of service placements veterans represented 43%, in skilled occupational groups 62%, in semiskilled 69% and in unskilled 64%.

In addition to duties connected with the placement program and the claims-taking function (which is discussed elsewhere in this report), activities of the employment service included the taking of 334,667 work applications, including 119,436 from veterans. Because of the large number of veterans seeking employment upon release from the armed services, the number of work applications filed in the preceding year (434,400) was greater than in the current year by nearly 100,000. In fiscal year 1945-1946, some 250,214 work applications were filed by veterans.

The number of visits to employers more than doubled in the current year, when 63,890 were recorded as compared with 31,601 in the prior year.

The counseling program also greatly expanded during the current year. Some 50,173 employment counseling interviews were conducted in the various offices as compared with 21,184 in the prior year. Particular emphasis has been placed on the counseling of handicapped workers.

Closely allied to employment counseling is the occupational testing program under which some 2,717 proficiency tests were administered in the current year to 2,125 individuals, and 4,870 aptitude and interest tests were administered to 1,055 individuals.

Between claims-taking and other employment service activities summarized above, in the year ending June 30, 1947, a total of 7,495,457 visits were made, by claimants and other applicants, to the 39 employment offices distributed throughout Massachusetts.

CLAIMS FOR UNEMPLOYMENT COMPENSATION

Material shortages, cost-price problems and the reestablishment of seasonal employment patterns are some of the factors responsible for the continued upward trend in claim loads in the current fiscal year. Initial claims totaling 428,293 were up by 20% from last year's figure, while continued claims increased by 27% to a total of 2,844,779. The following summary shows the number of initial and continued claims received in the current and in the two preceding fiscal years. Additional claims and continued claims for partial and part-total unemployment showed the greatest percentage increase in the most recent year.

	July 1, 1944- June 30, 1945	July 1, 1945- June 30, 1946	July 1, 1946- June 30, 1947	% of Increase in Year Ending June 30, 1947
Total Initial Claims*	80,169	356,851	428,293	20.0
New Claims	49,478	271,479	315,110	16.1
Additional Claims	28,593	70,947	100,888	42.3
Interstate Claims	2,098	14,425	12,295	-14.8**
Total Continued Claims*	226,233	2,227,465	2,844,779	27.7
Total Unemployment Partial and Part- Total Unemployment	186,669	2,034,487	2,563,825	26.0
Interstate Claims	30,382 9,182	93,218 99,760	191,933 89,021	106.0 -10.8**
Ratio of Continued Claims to Initial Claims	2.8	6.2	6.6	

* An initial claim is a claim which declares the claimant's entrance into an unemployed status. There are three kinds of initial claims--

New claims, received from individuals filing a claim for the first time in the current benefit year; additional claims, received from individuals who have already filed one or more claims in the current benefit year; and interstate claims, taken as agent and forwarded by the employment offices to the respective liable states.

Continued claims are taken following the completion of each week of unemployment.

Claims for unemployment benefits may result from total unemployment or from partial or part-total unemployment.

** Decrease.

Chart III shows the trend in the initial claim load in the period from January 1940 through June 1947. April peaks mark the beginning of each new benefit year, while the upswing in August 1945 indicates the end of active hostilities. It will be noted that the peak reached in April 1947 was the highest point since 1940.

While a comparison of the number of initial claims received in the current and preceding years showed a net increase of 20% (71,442), Table VIII shows substantial decreases in Springfield (12,061), Lawrence (11,383), Holyoke (2,380), Waltham (2,055), Worcester (1,995), Pittsfield (1,002), and Greenfield (511). These decreases were largely attributed

CHART III
 INITIAL CLAIMS FOR UNEMPLOYMENT COMPENSATION
 by Months
 January 1940 - June 1947

to some easement of material shortages particularly in metal products, the continued upward trend in employment in the woolen and worsted industries and the fact that claim loads in Springfield, Pittsfield, and Waltham were exceptionally high in the preceding year.

The types of claims received in each employment office, the percent of the state total, and the ratio between initial and continued claims are shown in Table IX. Reduction in "staggered employment" in the woolen industry is responsible for a noteworthy drop in additional claims received in Lawrence. Whereas two years ago this office reported a total of 17,877 or 62.5% of the state total, in the current fiscal year additional claims filed in Lawrence aggregated 11,149, or over 11.0% of the state total.

The ratio between initial and continued claims was highest in Quincy, where, on the average, 9.7 continued claims were filed for each initial claim. Claimants in this city (largely shipyard workers) have had considerable difficulty in finding reemployment.

Data covered in Table IX are shown separately for men and for women in Table IX-A and IX-B. While state totals showed that 53% of new claims were filed by men, certain individual office figures showed women claimants to be in the majority. This was particularly noticeable in textile centers. In general, the ratio between initial and continued claims was slightly greater for men than for women.

While all types of domestic (intra-state) claims increased in the current over the preceding year, interstate claims declined, both in cases where Massachusetts acted as agent and in cases where Massachusetts was the liable state. This situation was explained by the fact that the inter-state claim load was very heavy in the preceding year due to the return of wartime workers to their home states in the months immediately following the end of hostilities. Interstate claims represented 2.9% of initial claims in the current year as compared with 4.0% in the prior year.

The five most important states from the viewpoint of initial claims where Massachusetts was the liable state, included New York (1,718), California (1,598), Rhode Island (1,341), New Hampshire (1,129), and Florida (1,079). It might be observed that only three of these are "neighboring" states.

Although the number of checks issued by Massachusetts to claimants whose wage credits were earned in this state but who filed claims elsewhere, decreased from 41,401 to 39,207 in the current year, the amount of these payments increased from \$826,611 to \$859,365. This was consistent with the increase in the average benefit check noted in Table XI.

The following tabulation shows the number of claims received by Massachusetts acting as agent for other states, together with the number and amount of checks issued by Massachusetts to out-of-state claimants whose wage credits were earned in this state.

	July 1, 1946- June 30, 1947	July 1, 1945- June 30, 1946	Decrease	
			Number	%
Massachusetts--Agent				
Initial Claims	12,295	14,425	2,130	14.8
Continued Claims	89,021	99,760	10,739	10.8
Massachusetts--Liable				
Number of Checks	39,207	41,401	2,194	5.3
Amount of Payments	\$859,365	\$826,611	\$32,754*	4.0*

* Increase

Claims which are disputed for any reason are referred for decision to the Determination and Adjustment Division in the Administrative Office. While the number of these disputed claims has increased by nearly 6,000 in the past year, the ratio to initial claims has decreased from 10 disputed claims for every 25 initial claims received in fiscal year 1946 to 10 disputed claims in 29 initial claims received in the current fiscal year.

The largest number of disputed cases were those on which there was a question as to whether the claimant had quit voluntarily, had been discharged for misconduct, or for some other reason had become ineligible for benefits.

Disqualification cases showed the greatest increase--8,160 or 35%. The procedure (initiated in March 1947) of calling claimants in for reinterview every fifth week during unemployment provides an opportunity for identifying those who may not actually be seeking work.

The proportion of cases disputed on questions relating to wage records has decreased each year since 1943-44 when 3.8% of initial claims were disputed on grounds of insufficient wages. With increased earnings in the base period, this proportion has dropped to 1.3% of initial claims received in the current year.

DEPENDENTS' ALLOWANCES

Beginning in April 1947, totally unemployed workers in Massachusetts who are eligible for unemployment compensation benefits are entitled to an allowance of \$2.00 for each of their dependent children under 18 years of age.

The total amount which a claimant may receive is limited by the provision that it shall not exceed his "weekly wage." The "weekly wage" is estimated as one twenty-sixth of the total wages reported for him in the two highest quarters of his base period or, in the case his wages include not more than one quarter of the base period, his "weekly wage" is estimated as one-thirteenth of the total for such quarter.

Analysis of the Division's experience in the first three months of this program is summarized as follows:

1. Approximately 2.8% of the total amount paid in benefits between April 14 (the date when payment of these allowances began) and June 30, 1947, represented dependents' allowances.
2. Nearly 16% of all claimants had at least one dependent. In the case of male claimants 31.6% had one or more dependent children, as compared with 1.7% of the female claimants.
3. Approximately 86% of men with dependent children were already entitled to receive the maximum weekly benefit rate of \$25, while 42% of the women were in this group.
4. Of those claiming dependents' allowances, 40% of the men and 67% of the women had only one dependent child, while 30% of the men and 9% of the women had three or more.

BENEFIT PAYMENTS

Benefit payments reached a new high in the current fiscal year when \$48,997,580 was paid from the Unemployment Compensation Fund to workers in Massachusetts. As compared with the preceding year this amount represented an increase of 38%, which was due primarily to a heavier claim load in the current year but was also attributable in part to the increase in the maximum benefit rate from \$21 to \$25 on claims filed on and after April 1, 1946. This latter factor is reflected in the average benefit check for total unemployment, which rose from \$19.89 to \$21.71.

The effect of the new provision for the payment of dependents' allowances was small. The provision became effective in April 1947; at the close of the fiscal year some \$413,229.00 had been distributed--about 2.8% of total benefit payments in the same period.

Tables X-XIII show the distribution of benefit payments by month, office, sex, type of unemployment, and major industrial groups. The distribution of benefit payments by major industrial groups is also compared for the past three years in Chart IV.

The following facts are shown in these tables:

1. Benefit payments, which increased from \$524,165 to \$2,339,441 in the first month following the end of active hostilities, kept mounting till July 1946 when they began to drop. In January 1947, however, they took a sharp upward turn and reached an all-time high of \$6,383,420 in June 1947.
2. Payments for partial unemployment represented 2.6% of total benefit payments in the current year as compared with 1.6% in the preceding year. Haverhill had the largest proportion of these payments--13.7%. This area had suffered particularly from continued falling off in the production of women's novelty shoes, and working hours at several establishments had been cut to avoid general layoffs.
3. In 16 of the 39 offices total benefit disbursements exceeded \$1,000,000; Boston, Quincy, Springfield, and Brockton exceeded \$2,500,000.
4. Men received 64% of benefit payments for total unemployment but only 35% of payments for partial unemployment, reflecting the concentration of part-time work in industries employing large numbers of women (apparel and shoe manufacturing).
5. The average benefit check for total unemployment received by men (\$23.46) was greater by \$4.39 than the average check received by women (\$19.07).
6. The industrial distribution of benefit payments in the calendar year 1946 showed that workers laid off by manufacturing concerns received 73% of total benefits.

7. Over \$16,500,000 or 39% of the total was distributed to workers who had been employed in industries particularly essential to the war effort--the manufacture of transportation equipment (including shipbuilding), machinery, both electrical and other, and ordnance.
8. Workers employed in the manufacture of textiles, apparel, food, and shoes and leather (industry groups of major importance in Massachusetts in peace as well as in war) received benefits amounting to approximately \$7,500,000 of 18% of the total.
9. Comparison with data for the calendar year 1944 showed that payments charged against those industries engaged primarily in manufacturing war equipment and munitions increased from slightly over \$300,000 to more than \$16,500,000, while the more stable manufacturing industries increased from approximately \$1,320,000 to \$7,500,000. (The two groups had about the same number of employees in June 1945.)

Notwithstanding the fact that the Division issued more than 4,800,000 checks during the current fiscal year, 88% of the payments for total unemployment (both unemployment compensation and servicemen's readjustment allowances) were made "on time" (in the seven days following the week of unemployment for which the check was issued).

The following tabulation is based on figures released by the Bureau of Employment Security and shows that in the quarter ending June 30, 1947, Massachusetts issued 93.5% of all intrastate payments for total unemployment within two weeks after the end of the compensable week. This was considerably above the national average of 85.1%. Comparison with eight states of comparable size and industrial pattern showed that (as in 1946) California was the only state with a better record than Massachusetts. In California payments are made in cash at the local office on the day the compensable claim is filed, while in Massachusetts payments are made by check by the Administrative Office on receipt from the employment office of "warrants" covering such payments.

	A P R I L - J U N E 1 9 4 7

DURATION OF BENEFITS

In an analysis of the benefit experience and characteristics of individuals filing claims in the benefit year 1946-47, together with a comparison of the findings of this analysis with similar figures for prior years, the following items were found to be of major interest:

1. Average potential duration for all claimants decreased from 19.4 weeks in the benefit year 1945-46 to 18.2 in the current year. This was attributed primarily to the increase in the maximum benefit rate, which reduced duration of benefits for some claimants in the \$22 to \$25 bracket.
2. In the current year men claimants were entitled to an average potential duration of 19.3 weeks, while women had an average potential duration of 16.8 weeks.
3. Some 31.0% of all claimants in the current year were entitled to the maximum potential duration of 23 weeks as compared with 14.6% in the prior year.
4. Nearly half of the men claimants, but only 8.7% of women, were entitled to the maximum of 23 weeks.
5. There was a slight decrease in the average actual duration for all claimants from 8.5 weeks in 1945-46 to 8.2 weeks in 1946-47.
6. The average actual duration for men remained unchanged (8.8 in both the current and prior years). The average for women dropped from 8.3 weeks to 7.5 weeks in 1946-47. The decrease in average actual duration for women was attributed partly to the decrease in potential duration and partly to improved employment opportunities for women in 1946-47.
7. The proportion of claimants drawing one or more checks who exhausted their benefit rights increased from 28.8% in the year 1945-46 to 38.8% in 1946-47.

OVERPAYMENTS OF CLAIMS FOR BENEFITS

The number of active accounts for overpayments on unemployment compensation benefits doubled between the beginning and end of the current fiscal year, while the amount involved tripled. Analysis of accounts covering overpayments of unemployment compensation benefits may be briefly summarized as follows:

1. On July 1, 1946, the 1,860 outstanding overpayment accounts amounted to \$60,949.25.
2. New overpayment accounts, numbering 3,557 were established during the year. These accounts amounted to \$127,658.00.
3. Collections, either in cash or by offsets against benefits currently payable, totaled \$89,855.35.
4. On June 30, 1947, the 2,489 overpayment accounts outstanding aggregated \$98,383.90.
5. Comparison of the figures quoted above with those reported for the preceding year showed an increase of 104% in the amount liquidated either by collections, offsets, or cancellation, and an increase of 46% in the number of cases completely liquidated.

Analysis of overpayments on readjustment allowances may be summarized as follows:

1. On July 1, 1946 the 105 outstanding items amounted to \$6,381.00.
2. During the fiscal year additional overpayments were established in the amount of \$211,983.00 (4,756 cases).
3. Some \$76,258.04 was collected, with 2,439 cases completely liquidated. Reimbursement through offset--a method first put into operation in September 1946--totaled \$33,579.00.
4. On June 30, 1947, overpayments outstanding amounted to \$87,227.10, representing 1,350 cases.

EMPLOYERS SUBJECT TO THE MASSACHUSETTS EMPLOYMENT SECURITY LAW

On June 30, 1947, there were 83,008 employers subject to the Massachusetts Employment Security Law. Some 17,316 employers had been added during the fiscal year, including employers engaged in the fishing business, who became newly subject in July 1946. During the same period 11,433 employers had been removed from the rolls, resulting in a net gain of 5,883.

Approximately 40% of all status determinations were for successor employers who had taken over all or some part of a business whose workers were already covered by the Law.

CONTRIBUTIONS TO THE UNEMPLOYMENT COMPENSATION FUND

The sum of \$28,083,834.10 was collected as contributions to the Unemployment Compensation Fund in the current fiscal year--up by nearly 29% from the amount collected in the preceding year. This increase is attributed in part to a larger amount of taxable wages and in part to an increase in the average contribution rate.

Contributions on wages earned in the calendar year 1946 totaled \$24,863,940--an increase of 12.5% over the preceding calendar year, attributed to the increase in the amount of taxable wages. (The average contribution rate was approximately .9% in both years.)

Table XIV shows for the calendar year 1946, the amount of total compensation, taxable wages, and contributions by industry divisions and by major industry groups. Average contribution rates are also shown. This table is briefly summarized as follows:

1. Employers in manufacturing industries paid contributions amounting to \$12,728,092 or 51.2% of the total.
2. The major industry group contributing the largest amount was "textile mills"--\$2,590,294. This group was the heaviest contributor in 1945 also.
3. Contributions amounting to over \$1,000,000 were also paid by employers engaged in the manufacture of shoes and leather, apparel, and machinery (both non-electrical and electrical).
4. Highest average contribution rates were paid by employers in the manufacture of apparel (1.47%), construction (1.35%), personal services (1.24%), eating and drinking places (1.21%), manufacture of shoes and leather (1.12%), retail trade not elsewhere classified (1.10%), business services (1.08%), retail apparel and accessories (1.04%), hotels and rooming houses (1.00%), and retail food and liquor stores (1.00%).
5. Some 13.4% of total payrolls in establishments subject to the Law was not taxable since it was paid to individuals who had earned more than the maximum of \$3,000 taxable during a given year. The proportion of total payrolls in this category in the prior year was 12.7%.

EXPERIENCE RATING IN 1947

Some 29,795 employers who had been subject to the Massachusetts Employment Security Law prior to January 1, 1943--or who, as successors, had "inherited" the experience-rating record of such an employer--were entitled to rate computations for 1947 under experience-rating provisions of the Law. While these employers represented only 37% of all employers subject at January 1, 1947, they accounted for 87% of the total taxable pay rolls of all employers for 1946. Since these rates were computed on the basis of benefit experience in 1944, 1945, and 1946 they show some effect of postwar employment conditions. The following items were taken from a detailed report on Experience Rating in 1947 in Massachusetts.

1. The average contribution rate for all employers (both rated and unrated) advanced from .88% in 1946 to 1.1% in 1947. (Corresponding averages were .85% in 1945; .93% in 1944; 1.28% in 1943; and 1.52% in 1942.)
2. Nearly 8,000 Massachusetts employers are paying higher rates in 1947 than in 1946. For nearly 4,000 of them (e.g., where the rate increased from .5% to 1.0%) costs of unemployment compensation coverage have doubled, and for more than 400 the shift has been from the minimum rate to 2.7%.
3. More than 95% of the rated employers obtained some reduction in rate, the reduction varying from .2% to 2.2% of their taxable pay rolls. For rated employers, the average contribution rate for 1947 is .93%. (For prior years corresponding averages were .59% in 1946; .60% in 1945; .72% in 1944; 1.08% in 1943 and 1.32% in 1942.)
4. Only 68.2% of the rated employers in 1947 qualified for the minimum rate, as compared with 91% last year.
5. Average contribution rates showed significant variations by size of establishment. Employers with annual pay rolls between \$10,000 and \$50,000 averaged .81% with the highest rates appearing at the two extremes of the size-of-establishment range. Firms with pay rolls of \$1,000,000 and over averaged .99% while those with pay rolls of less than \$5,000 averaged .88%.
6. Industry groups showed wide variation in average rates, reflecting differences in the amount of unemployment occasioned by postwar readjustments. Manufacturers of ships and other transportation equipment shot from the very low average of .55% in 1946 to the extremely high average of 2.15% in 1947. Finance, insurance, and real estate concerns and those engaged in furnishing transportation, communication and utilities retained their low averages of prior years, notwithstanding the upward shift in rates generally.
7. Savings to employers through rate reductions (from the 2.7% rate) in 1947 are estimated (on the basis of 1946 taxable pay rolls) at approximately \$43,726,000.

EMPLOYMENT AND WAGES IN ESTABLISHMENTS COVERED BY THE MASSACHUSETTS EMPLOYMENT SECURITY LAW

Following a temporary interruption in its upward trend, covered employment rose sharply from 1,307,359 in February 1946 to a new high of 1,471,253 in December 1946. The first six months of 1947, however, saw a reversal in the trend due to the reappearance of a seasonal pattern in certain industry groups, and to unemployment resulting from material shortages, cost-price problems and labor-management differences. It was estimated that employment in June 1947 had dropped by some 50,000 from the high of December 1946.

Covered workers received wages aggregating \$3,253,410,700 in the calendar year 1946. The increase of \$374,590,200 (13%) represented by this amount was due primarily to fuller employment and increased pay rates. It was estimated that total compensation of covered workers in the first six months of 1947 was greater by 15% than in the first six months of 1946.

Trends in monthly employment and quarterly pay rolls since 1940 are shown in Chart V. The large increases in pay rolls in the December quarter in each year include bonuses and other compensation paid in that quarter but actually applicable to services rendered throughout the year. In connection with figures appearing in this report it should be noted that these data are based on "Employers' Quarterly Wage and Contribution Reports" filed with the Division and do not include establishments not covered by the Massachusetts Employment Security Law.

The industrial distribution of monthly employment and quarterly pay rolls for employing units subject to the Law is shown in Tables XV and XVI. These tables may be briefly summarized as follows:

1. Employment in manufacturing gained some 68,500 (9.9%) from 694,017 in December 1945 to 762,529 in December 1946. Similar increases were noted in wholesale and retail trade--up 9.0%; transportation, communication, and other public utilities--up 10.1%; finance, insurance, and real estate--up 10.3%; service--up 9.9%; construction--up 37.8%; and "all others"--up 34.5%.
2. Comparison of total compensation paid in covered employment in 1946 and 1945 showed that pay rolls increased more sharply than employment in all industrial divisions except manufacturing, where the increase amounted to 3.0%. The greatest increase was in construction pay rolls which gained 62%.
3. More than one out of every eleven covered workers in Massachusetts in December 1946 was engaged in the manufacture of textile-mill products. Employment of 138,323 in this industrial group in December 1946 was 11% greater than in the previous December, while compensation for the calendar year 1946 increased by 25% over 1945 and aggregated \$302,922,900.

CHART V - INDEXES--WAGES AND EMPLOYMENT--ALL INDUSTRIES
 January 1, 1939 - June 30, 1947
 Based on Quarterly Contribution Reports of Employers
 Subject to the Massachusetts Employment Security Law
 Employment - 954,466 = 100.0%
 Wages - \$312,275,932 = 100.0%

* Increase in January 1943 accounted for by extension of coverage to employers of 1 or more. Estimated number of workers affected--60,000.

4. Employment in the manufacture of transportation equipment (including shipbuilding) decreased steadily from 25,833 in December 1945 to 13,585 in December 1946. (Some 87,339 workers were employed in this industry in June 1943.)

Complete data on employment and wages for the first six months of 1947 are not yet available. Estimates, however, based on over 90% of complete data indicate the following:

1. Employment dropped by some 20,000 between January and June 1947. On the other hand, a comparison of wages in the three months ending June 30, 1947, with wages in the first three months showed an increase of approximately \$13,000,000.
2. Employment in manufacturing decreased between January and June, while employment in all other industrial divisions increased.
3. In June 1947, 51% of covered workers were in manufacturing including 10.9% in machinery (both electrical and non-electrical), 9.4% in textile mill products and 4.6% in shoes and leather.

Changes in the industrial distribution of employment from the war-time peak of June 1943 are shown in the following tabulation:

Number of Workers Employed in Establishments
Covered by the Massachusetts Employment Security Law

	<u>All Industries</u>	<u>Manufac- turing</u>	<u>Trade</u>	<u>Service</u>	<u>Construc- tion</u>
June 1943	1,420,200	845,284	293,166	96,131	40,043
June 1944	1,375,303	802,615	296,843	98,766	32,578
June 1945	1,339,397	755,778	301,347	101,554	35,737
June 1946	1,435,379	742,229	342,918	119,730	61,513
June 1947	1,418,200*	710,500*	356,300*	118,000*	61,300*

* Estimated

OPERATIONS IN MASSACHUSETTS UNDER THE
SERVICEMEN'S READJUSTMENT ACT OF 1944

Service to veterans continued to be of major importance. Although the S.R.A. claim load is diminishing rapidly, it totaled 2,946,743 initial and continued claims and constituted 47% of the total claim load, in the current fiscal year. New claims, which reached a peak of 42,885 in January 1946, had dropped to 3,769 in June 1947, while continued claims, which reached their maximum (372,396) in July 1946, dropped to 144,877 in June 1947.

Since the Servicemen's Readjustment Act went into effect in September 1944, 302,049 veterans had applied for allowances, while a total of 4,730,400 checks amounting to \$95,057,422 had been issued to unemployed and self-employed veterans, up to June 30, 1947.

Tables XVII and XVIII show the distribution of readjustment allowance claims by month and by type of claim, for each employment office, for unemployed and for self-employed veterans. Table XIX shows the distribution of readjustment allowance payments by office and by type of payment. Employment service activities on behalf of veterans are shown for each employment office in Tables V, VI, and VII.

OPERATING EXPENSES

Administrative costs of the Massachusetts Division of Employment Security totaled \$4,773,309.80 in the 12 months ended June 30, 1947. Throughout the year facilities of the Division were used in the administration of the Servicemen's Readjustment Act of 1944 and the cost of such services to veterans is included in the above amount. Also included are certain invoices paid for the United States Employment Service prior to the return of the service to state control on November 16, 1946, as well as the entire cost of employment service since that date.

The following tabulation shows a summary of funds available for the fiscal year ended June 30, 1947, and expenditures charged against them.

Sources of Funds

	<u>Total</u>
Unexpended balance as of July 1, 1946	\$ 28,233.09
Funds made available in the fiscal year ended June 30, 1947	
Federal grants under Title III of the Social Security Act	\$2,478,905.20
Federal grants under Title V of the Servicemen's Readjustment Act of 1944	1,129,105.00
Federal funds received from the United States Department of Labor for Employment Service Activities	1,163,756.62
Miscellaneous income	<u>5,193.06</u> 4,776,959.88
Total available July 1, 1946-June 30, 1947	\$4,805,192.97
<u>Deduct</u>	
Expenditures, July 1, 1946-June 30, 1947	<u>4,773,309.80</u>
Balance available for reallotment for expenditures for July 1, 1947-June 30, 1948	<u>\$ 31,883.17</u>

Expenditures for the fiscal year are itemized as follows:

Item	Amount	% of Total
Total expenditures	\$4,773,309.80*	100.0
Personal services	3,976,113.20	83.3
Rent of premises	260,789.45	5.4
Rent of equipment	165,042.11	3.5
Supplies	163,508.78	3.4
Communication	70,487.93	1.5
Travel	42,955.85	.9
Heat, light, and water	37,414.44	.8
Repairs and alterations	7,970.08	.2
Purchase of equipment	6,305.68	.1
Printing and binding	1,292.37	.0
Miscellaneous	41,429.91	.9

* Includes the cost of services to veterans under the Servicemen's Readjustment Act of 1944, and certain invoices paid for the United States Employment Service prior to November 16, 1946.

PERSONNEL

At the end of June 1946, employees of the Division of Employment Security totaled 1,152, of whom 739 (64%) were premanent and 413 were on a temporary or provisional appointment. On November 16, 1946, with the return to state control of the employment service and the departments of Information, Training, and Research and Statistics, which had been on a "war-time loan" to the federal government, the number of employees of the Division totaled 2,417, including 1,449 (60%) who were on a temporary or provisional basis. This latter group represented individuals in positions which were either exempted by law from the provisions of civil service, or for which there were no established civil service lists.

The monthly distribution of permanent and temporary of provisional appointees in the administrative and local offices is shown in the following table:

	ALL EMPLOYEES			ADMINISTRATIVE			LOCAL OFFICES		
	Total	Perma- nent	Tempo- rary and Provi- sional	Total	Perma- nent	Tempo- rary and Provi- sional	Total	Perma- nent	Tempo- rary and Provi- sional

TRAINING DEPARTMENT

The Training Department (which together with the employment service and Information and Research and Statistics Departments had been operating under federal jurisdiction since the beginning of 1942) was returned to state control as of November 16, 1946. Activities of the Training Department are conducted by two divisions. Duties performed by the Staff Training Division may be summarized as follows:

1. Complete induction training for 37 new senior clerk-interviewers. This covered a basic knowledge of the Employment Security program, the Massachusetts Employment Security Law, organization and functions of the Division, procedures for taking claims and applications for work.
2. Specialized training for 53 employment counselors and 38 veteran employment representatives on such subjects as employment counseling, selective placement for the handicapped, and responsibilities of employment office veteran representatives.
3. Intensive refresher training for all employment office personnel responsible for the following functions:
 - a. Determination and adjustment
 - b. Claims-taking
 - c. Application-taking
 - d. Order-taking, selection and referral
 - e. Occupational classification
4. Introduction of such new programs and procedures as
 - a. Interoffice placement
 - b. Dependents' allowances
 - c. Interest inventory (for counselors)
 - d. Seamen's benefits
 - e. Standard Industrial Classification System
 - f. National workload analysis program
5. Specialized training in job analysis techniques for 10 principal interviewers.
6. Supervisory training for superintendents and office managers in methods and techniques for evaluating employment office operations.

In addition to employing the conference type of group training, the Training Department experimented with providing to individual interviewers on-the-job training in such functions as occupational classification and application-taking.

The Bulletins, Manuals and Forms Division was responsible for the following activities:

1. Editing, preparation, and clearance of proposed revisions in existing procedures
2. Maintenance of all manuals of the Division.
3. Editing, clearance, assembling, and distributing of all bulletins of the Division.
4. Clearance of all new and revised forms.
5. Preparation of special reports and preliminary drafts of new procedures on dependents' allowances, seamen's benefits and mass layoffs.
6. Preparation of training materials.

During the period, the Training Department prepared and published numerous agenda to be used as the basis for employment staff training conferences, a "Handbook for New Employees", and three training aids for employment office managers on the subjects of claims-taking, application-taking, and order-taking.

INFORMATION DEPARTMENT

As of November 16, 1946, the Information Department, (together with the employment service, Training Department, and the Research and Statistics Department) was returned to state control. In connection with this return the Information Department spent much time in realigning its activities to meet the needs of the Division and in setting up a long-range informational program. Pamphlets, booklets, and other informational materials were prepared and distributed, while speakers were furnished to employer groups, civic organizations, labor groups, and veteran organizations. The Information Department also issued the monthly "Newsletter of Employment Conditions" which is prepared in the Research and Statistics Department.

Major duties of the Information Department may be grouped under the following three items:

1. Informing the general public of activities of the Division of Employment Security and their effect upon the economy of the State.
2. Informing employers of their rights and responsibilities under the Employment Security Law.
3. Informing workers and veterans of their rights and responsibilities under the Employment Security Law, the "G. I. Bill of Rights" and other Laws under which the Division pays unemployment benefits.

LEGAL DEPARTMENT

Statistics relating to activities of the Legal Department are briefly summarized below:

1. Members of the Legal staff appeared in the District Courts of the Commonwealth in 682 cases; in the Superior Courts, civil and equity, in 62 cases; in the Appellate Divisions of the District Courts in 6 cases; in the Probate Courts in 15 cases; in the U. S. District Court for the District of Massachusetts in 77 cases; and in the U. S. Circuit Court of Appeals in 1 case.
2. Collections by the Legal Department for the fiscal year 1946-1947 totaled \$161,071.11, tabulated as follows:

Contract actions	\$112,089.26
Collections from delinquent employers (without litigation)	20,633.28
Dishonored checks	338.44
Benefit overpayment recovery - civil action	1,175.56
Benefit overpayment recovery - criminal action	2,080.00
Bankruptcies, assignments, receiverships, deceased employers	<u>24,754.57</u>
Total	<u>\$161,071.11</u>
3. Material was certified to the Social Security Administration in 111 instances.
4. Subpoenae totaling 232 were issued for the appearance of employers and employees with reference to collections and overpayments.
5. As a result of subpoena process and correspondence, 163 hearings were held with reference to delinquent employers, overpayments, and refunds.
6. Applications for refunds of contributions claimed to have been overpaid were approved in 98 cases and denied in 85 cases.
7. Payment of benefits due deceased and legally disabled claimants was authorized under Chap. 151A of the General Laws, in 97 cases representing the sum of \$4,898.00. Payment was denied in 19 cases. Under Title V of the Servicemen's Readjustment Act of 1944, 39 such cases (\$1,754.00) were certified to the Veterans' Administration as eligible for payment.
8. Cases involving the recovery of benefit overpayments through civil actions were closed in 86 instances.

9. Cases involving the recovery of benefit overpayments through criminal actions were closed in 23 cases.
10. Court decisions were rendered on 43 appeals from decisions of the Board of Review. In 32 instances the decisions of the Board of Review were affirmed and in 5 instances reversed, while in 6 instances the petitions were dismissed. Included in the 43 decisions were 9 petitions which were appealed to the Supreme Judicial Court.
11. A total of 142 interest or penalty reduction cases were approved and closed.
12. When benefit checks paid to claimants have been lost, either by the claimant (payee) or by the third party holder (endorsee), duplicate checks are issued upon execution and delivery of a satisfactory surety bond. Some 233 such cases were closed in the current fiscal year.

RESEARCH AND STATISTICS DEPARTMENT

The return of the employment offices to state control as of November 16, 1946, effected no significant change in the over-all functions of the Research and Statistics Department. All reporting and analysis services required by the state and federal administration while the offices were under the direct control of successive federal agencies had been performed by a single department, operating under the state administration of the United States Employment Services but carrying on also the research and statistics program of the Division of Employment Security.

The major activities of the Department during the year ending June 30, 1947, included the following:

1. The preparation of periodic summaries and administrative analyses of data relating to activities (both employment service and unemployment compensation) for the information and use of management at various levels throughout the organization.
2. The issuance of a confidential bi-weekly report on labor market developments to selected supervisory personnel, based upon information obtained through employment office channels.
3. The gathering, through labor market economists in the field, of information on employment conditions in the various areas throughout the state, the summarization and interpretation of such information, and the preparation of a monthly Newsletter (for issuance by the Information Department) analyzing labor supply and demand, and indicating (on the basis of information obtained from employers) the short-term prospects in the individual labor market areas and for the state as a whole. (This report increased in size from 19 pages in June 1946 to 29 pages in June 1947.)
4. The making of a survey to determine the extent to which workers in covered establishments in Massachusetts already enjoy protection against wage losses due to illness. (A similar study had been made in 1944.) A report on this survey was submitted by the Director to the Advisory Council and was included in its special report to the General Court on proposed legislation relating to "cash sickness benefits."
5. The preparation, for employment office use, of lists of covered employers operating in their respective areas, showing the number of workers employed and indicating the principal activity or product.

6. Special services rendered to the administration in the formulation of plans and policies for the reorganization of the Division incident to the restoration of the employment service staff and facilities to state control.
7. The tabulation, by industry, by employment office area, and by individual cities and towns within such areas, of employment and wages in covered establishments for the year 1945 and the issuance of summaries of such data to administrative personnel. (Copies of these tabulations are kept on file in the library--located in the Research and Statistics Department--for consultation by outside governmental agencies and by others interested in employment statistics.)
8. The submission of estimates as to the possible effects upon the Fund of various proposed revisions in the benefit formula or in the experience rating provisions of the Employment Security Law.
9. The preparation of work-load estimates for purposes of administrative planning and budgetary requirements.
10. The comparison of industrial coding assigned to covered manufacturing establishments by the Bureau of Old Age and Survivors Insurance for the purpose of bringing this agency's coding into agreement with it. (This comparison was still in process at June 30, 1947.)

Other activities included the preparation of periodic statistical reports required by the Social Security Administration, the United States Employment Service, and the Veterans Administration, and various types of labor market analyses (by area, industry and occupation)--also for the United States Employment Service.

The Department also assisted in the preparation of the Director's annual report and the quarterly and biennial report of the Advisory Council.

BOARD OF REVIEW

Activities of the Board of Review which increased tremendously in the current fiscal year in line with the greatly increased claim load, included the disposal of 20,531 appeals in connection with unemployment compensation and servicemen's readjustment allowance claims, the disposal of 20 employer status appeals, and 174 depositions for other states. These figures represent increases of 89%, 33% and 164%, respectively, as compared with fiscal year 1945-46. Notwithstanding this increase in disposals, the backlog of cases awaiting determination increased from 3,792 at July 1, 1946 to 9,155 at June 30, 1947.

Activities of the Board of Review may be summarized as follows:

A. Unemployment Compensation Claims Activities:

1. A total of 16,337 appeals were received in the current fiscal year as compared with 11,636 received in the prior year.
2. Approximately 91% of decisions (7,661) were on appeals of claimants to whom the Division of Employment Security had denied benefits. In 69% of these cases the decision of the Director was affirmed.
3. Decisions on employer appeals numbered 725, of which 62% upheld the decision of the Director.
4. Some 2,915, or more than a third of decisions, were on appeals involving questions of ability, availability, and whether or not employed. Another third involved questions as to whether the claimant had quit has job voluntarily.

B. Readjustment Allowance Claims Activities:

1. Some 8,568 appeals were received from unemployed veterans, while 138 appeals were received from self-employed veterans.
2. Nearly a third of the dispositions of these appeals was through default or by the withdrawal of the appellant.
3. The decision of the Director was affirmed in approximately two-thirds of the Board's decisions.

Decisions of the Board were appealed to the District Court in 284 cases, including one petition with 165 petitioners, one with 18, one with 13, and one with 10. In 35 cases the decision of the Board of Review was affirmed, while in 178 cases the Board was reversed.

Nine petitions (representing 3,923 cases connected with a labor dispute) which were appealed to the Supreme Court in the preceding fiscal year are still awaiting determination.

Some 20 appeals from finding of the Director on employer liability were received in the current year, while 20 were disposed of, leaving 16 pending at June 30, 1947.

Some 212 requests for depositions were received from other states, in addition to the 34 which were pending at the beginning of the year. While 174 were closed, the number of pending cases increased to 46 at the close of the year.
